

PNG LNG

PROJECT

LNG Project in Papua New Guinea

CARGO

Specialized drilling rigs, heat exchangers and power production equipment

OVERVIEW

Multiple vendors shipping cargo from load ports on the U.S. East, Gulf and West Coasts.

Uncertainty with the dates for shipment of certain critical components.

A variance with the volume of cargo expected vs. delivered for the project.

Carried over length and over weight specialty cargo with other general cargoes.

SHIPPING PLAN COMPONENTS:

Incentives to the project for combination of cargoes and/or for the carrier booking of completion cargoes for the voyage.

Flexibility with the dates for shipment through the use of cargo readiness clauses.

Acommodating cargo variances through consolidation of several parcels on multiple vessels in the carrier's fleet.
